

Health Compass Admin App – Work Status Report

Date: 10-06-2025

Project Overview

The Health Compass Admin App is designed to streamline management of health-related services, including user management, telemedicine, vaccination, caregiver coordination, and more. The project has made substantial progress, with most modules successfully completed.

Completed Modules

The following modules have been fully developed and implemented:

1. **Auth Module** - Completed, except for Google Login (Firebase setup pending).
2. **User Management** - Fully developed and operational.
3. **Supplement Management** - Successfully implemented.
4. **Telemedicine Management** - Fully functional.
5. **Vaccination Management** - Completed.
6. **Caregiver Management** - Fully developed.
7. **Feedback Module** - Implemented and operational.
8. **Content Hub** - Completed and integrated.
9. **Settings Module** - Developed and functioning.

These modules have been thoroughly developed, ensuring smooth functionality and integration within the system.

Pending Modules

The following module is still in progress:

1. **Activity Planner**
 - **UI:** Development completed.
 - **API Integration:** Pending.

The API implementation for the Activity Planner module is in progress and will be completed in upcoming phases.

Next Steps & Recommendations

1. **Finalize Firebase Setup** for Google Login in the Auth Module.
2. **Complete API Development** for Activity Planner to achieve full functionality.

3. **Prepare Deployment & User Onboarding Strategies** for seamless implementation.

Conclusion

The Health Compass Admin App has achieved significant milestones, with the majority of modules fully developed. The final steps involve completing API integrations and Google Login setup, followed by thorough testing and deployment planning.

We remain committed to delivering a robust and efficient system that meets all project objectives.
